

For Immediate Release

New 32" full high definition surgical monitor from Foreseeson Custom Displays, Inc.

Foreseeson's comprehensive range of LCD displays for the operating room has been expanded with the addition of a new 32" surgical monitor. "Our goal is to provide surgical displays of the highest image quality and reliability for an OR that requires nothing less," explains Daniel Tomlinson, the company's Sr. Product Manager, "and Foreseeson will continue to offer such solutions to our medical OEM customers and partners. As with all our medical product solutions, we maintain low installation costs while providing the latest in technology."

As operating room productivity and advanced instrumentation increase, a larger amount of images and data are required to be displayed. The Foreseeson 32" HD monitor is the solution.
